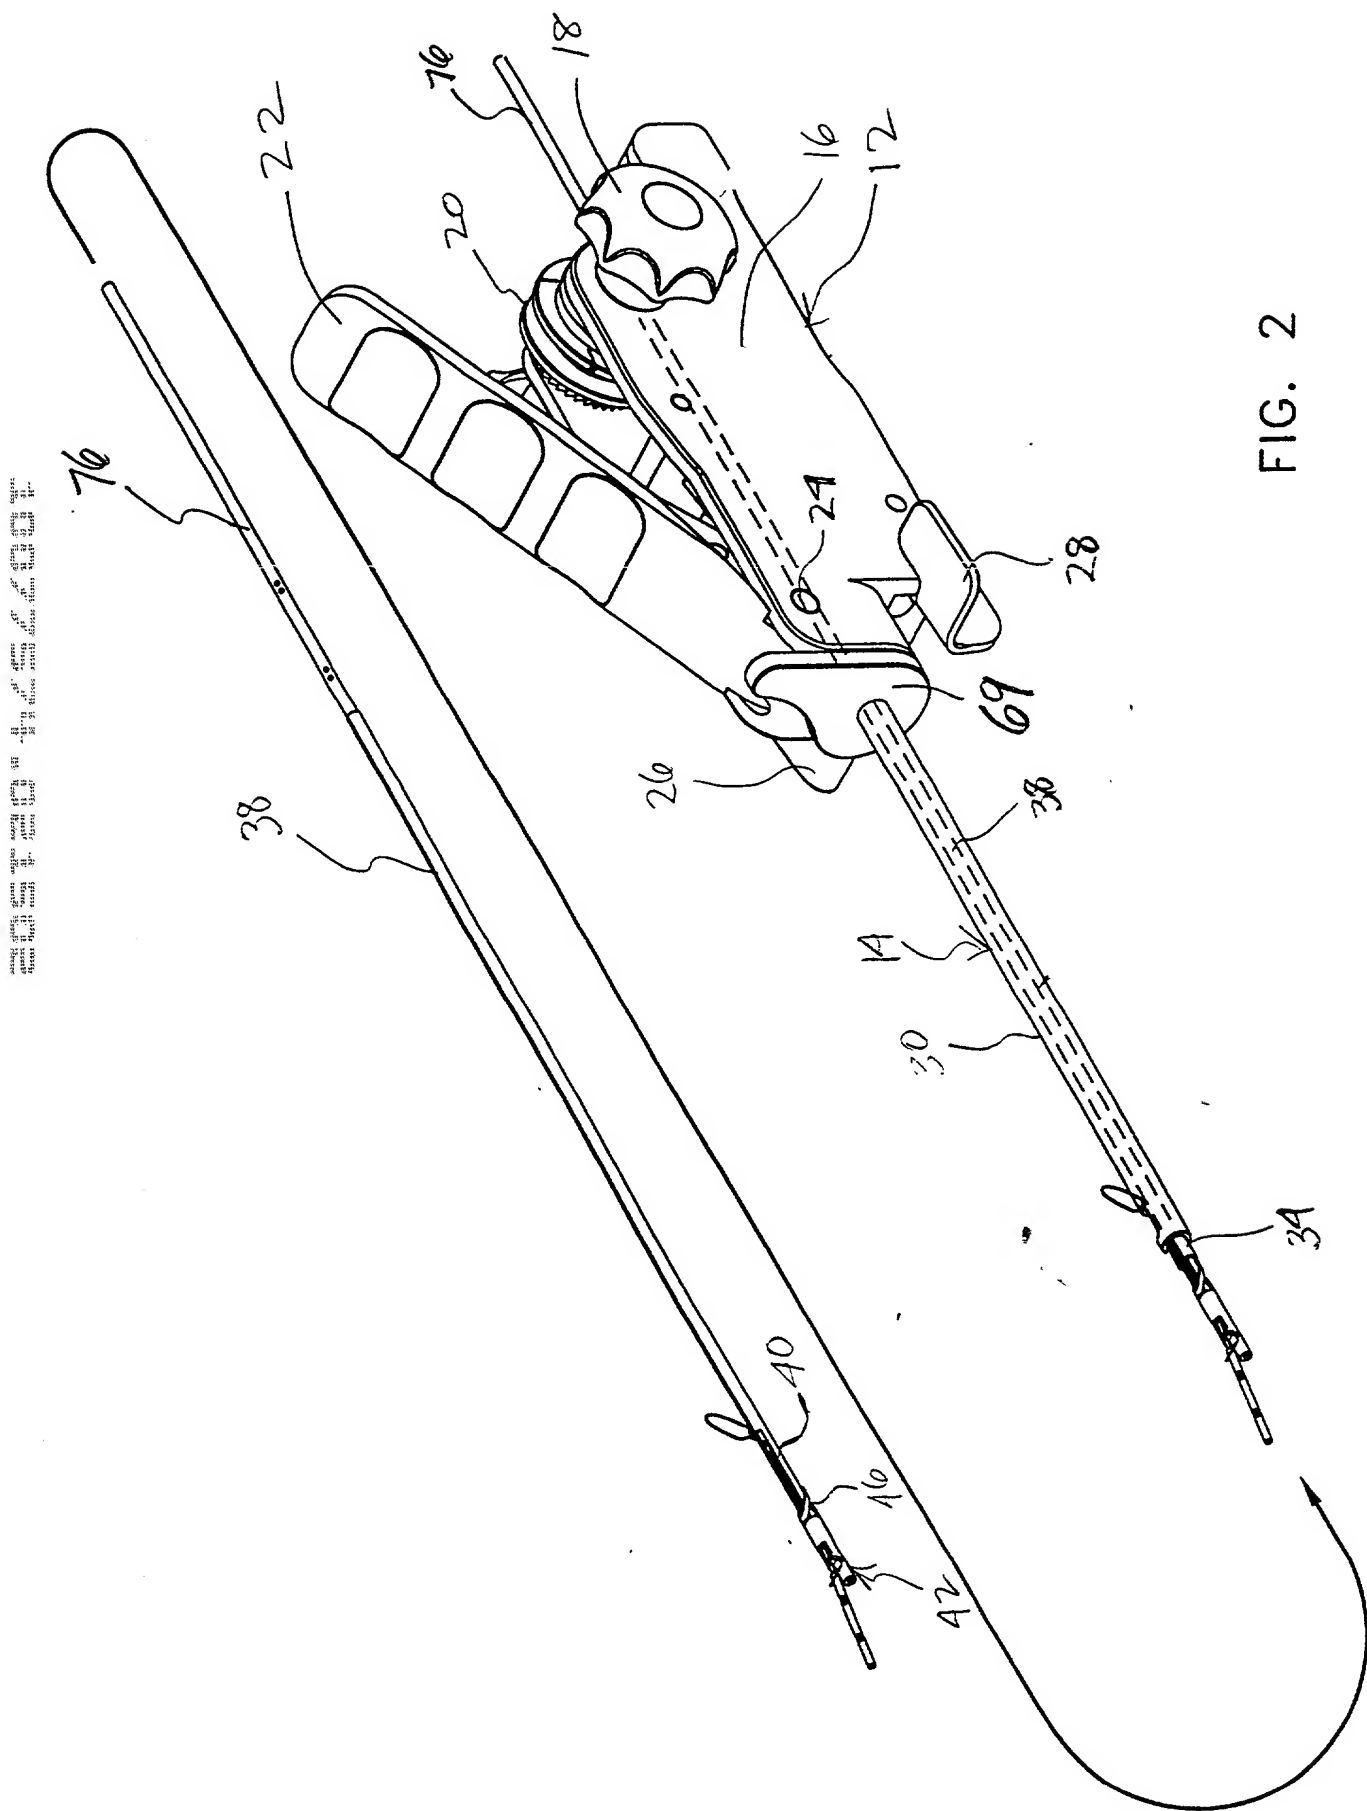

FIG. 2

FIG. 3 is a perspective view of the device 10 in a closed position. The device 10 includes a housing 12 and a handle 14. The handle 14 is pivotally connected to the housing 12 at a pivot point 16. The handle 14 is shown in a closed position, where it is aligned with the housing 12. The handle 14 includes a grip 18 and a trigger 20. The trigger 20 is located at the end of the handle 14 and is used to actuate the device 10. The housing 12 includes a front face 22 and a rear face 24. The front face 22 includes a window 26 and a button 28. The window 26 is used to view the target 30. The button 28 is used to actuate the device 10. The rear face 24 includes a hinge 32 and a latch 34. The hinge 32 is used to pivotally connect the housing 12 to the handle 14. The latch 34 is used to lock the handle 14 in a closed position. The device 10 is shown in a closed position, where the handle 14 is aligned with the housing 12. The device 10 is used to aim and fire a projectile at a target 30.

cross section of the device showing the internal components and the external housing. The device is shown in a cross-sectional view, revealing the internal mechanism. The external housing is shown as a series of concentric circles, and the internal components are shown as a series of lines and shapes. The device is shown in a cross-sectional view, revealing the internal mechanism. The external housing is shown as a series of concentric circles, and the internal components are shown as a series of lines and shapes.

FIG. 5E
